

DD/A/ODP WEEKLY REPORT

Week of 9-16 December 1977

I. Major Activities During the Past Week:

A. Support to OTR

PREVMAN - A system for preventive maintenance for OTR. A training session was held with the customer on 6-7 December at [REDACTED]. The system operated well on the 6th, but the intermittent problem with the CAMEXEC menus reoccurred on the 7th. Engineering Division performed tests for the remainder of the day without observing the problem. The same malfunction happened again on the 12th and Engineering Division was able to duplicate the problem at Headquarters. The Office of Communications will send someone to [REDACTED] to check out the communications equipment. [REDACTED]
